**Snow Removal Services 2012-2013**- So that owners are prepared and can plan for the upcoming winter season – below is a recap of the contracted snow removal services for 2012-2013.

- Removal of snow will begin at the end of any storm having at least 2" of accumulation over the entire property;
- The snow removal crew will begin to arrive within 1 hour after the storm has ended; regardless of the time. The crew will be split between the North/South side of the community;
- The entire property will be cleared within 3-5 hours depending on the amount of snow; and
- Roads will be salted as needed; and Common Areas will have ice melt applied as needed.

Depending on the condition of the roads – plowing/salting may be requested when a storm doesn't accumulate to 2". This service would not be covered under the existing contract and would be an extra, un-budgeted expense.

**Happy Holidays from your  
Management Committee and PMSI!**
